PROJECT OVERVIEW AND CHALLENGES

Bradshaw Construction installed 524 linear feet of 52.5 inch Permalok steel casing by microtunneling underneath the heavily traveled I-75 highway. We then installed a 36 inch ductile iron carrier pipe within the tunnel as a new water main. Bradshaw assisted the General Contractor with subcontractor supervision at no additional cost, helping to insure quality of the shaft and concrete work. Even with a vast amount of water leaking into the shaft, Bradshaw continued to mine through man made obstructions to the MTBM, while successfully managing line and grade to deliver a product ahead of schedule. Besides trash fill, the ground conditions included sand and limestone below the water table.

PROJECT INFORMATION - 513

OWNER:

Miami-Dade Water & Sewer
Department
3071 S.W. 38th Avenue
Miami, FL 33146
305-665-7477

ENGINEER:

AECOM Technical Services, Inc.
13450 W. Sunrise Blvd #200
Sunrise, FL 33323
James Penkosky
954-745-7200

CONTRACTOR:

GPE Engineering Contractors

COMPLETION DATE:

6/16/2012

GEOLOGY:

Limestone with Trace Sand

EXCAVATION METHOD:

Herrenknecht AVN-1000 MTBM

MINING DIMENSIONS:

524' x 54" Ø

FINAL LINING:

36" Ductile Iron Pipe
